Anouk Pfister — cv

I write the pages people read when something has gone wrong: runbooks, release notes, the handover nobody

Was ich mache / What I do:
- A runbook your night shift can follow at three in the morning — CHF 2800.
- Release notes for a quarter, written from the commits — CHF 1600.
- A day of sitting next to an engineer and writing down what they know — CHF 1100.
